Hans Gabriel B. Daduya

Software Engineer

I'm a Full Stack Engineer with experience in Web and Mobile Development mainly in React, React Native and Typescript. I also have experience in backend development with Express.js, GraphQL, Prisma, and PostgreSQL. I also have a strong experience when it comes to Software Engineering practices and fundamentals in Quality Assurance, Project Management, Agile and Scrum Development. I have 5 years of experience in Software Development and 3 years of professional experience.

Experience

October 2022 - September 2023

Ztock Inc. | Metro Manila

Full Stack Software Engineer, Remote

Helped build their mobile app for trading US based Stocks. Worked in React Native, Nextjs, Typescript, and Fastify. I first worked on their mobile app built in React Native and Expo fixing bugs and doing minor tasks. Worked extensively on their web application in partner with PayMaya for a Paper Trading Account Simulator. I also got to work in the backend for doing trading functionalities. Also worked on the Internal Dashboard for managing content for the mobile app. I observed scrum and agile practices during the work and I would talk to my CTO and CEO on a day to day basis regarding tasks.

May 2023 - December 2023

UniHub | Central Philippine University

Frontend Typescript Engineer

Was one of the cofounders of UniHub, a buy and sell marketplace for students. I worked on the mobile app and helped launch it for both iOS and Android as well as the web app for managing admin controls as well as other content. UniHub is a student lead project that we aimed to impact college students in our university in Central Philippine University. The project involved Typescript, React Native and Expo. I also acted as a Scrum Master for the team by managing tasks, initiating Scrum ceremonies and leading the team to accomplish their tasks. I also lead the decisions in technologies and tools that we used in UniHub.

January 2022 - June 2022

Clinisync | Iloilo City, Iloilo

Cypress Automation Tester

Did the End-to-end Testing for Clinisync, a client project for a doctor's appointment management platform using Cypress. Also used Cucumber to develop user scenarios for testing. Designed, developed and documented test cases and scripts for doing end to end automation processes. My day to day tasks involved talking with the Business Analyst regarding use cases, discussing with frontend and backend developers to develop test cases, and reporting defects in tests. Lastly, I was also in charge of setting up the CI/CD pipeline for running automated tests in github actions.
